Equations of Lines

Concept Review

Slope - $m = \frac{\text{rise}}{\text{run}} = \frac{y_2 - y_1}{x_2 - x_1}$

Slope / Intercept form of a Line - $y = mx + b$

\nearrow slope
 \downarrow y-intercept
 (0, b)

Write an equation in slope / intercept form of each line. (pg 372)

1) slope = 2; y-intercept = 5
 $m=2$ $b=5$

$y = mx + b$

want to fill the correct numbers for m and b.

$y = 2x + 5$

Write an equation in slope / intercept form of each line.

11) slope = $\frac{1}{2}$; passes through (4, -1)
 $m = \frac{1}{2}$ not b ;

$y = mx + b$
 $y = \frac{1}{2}x + b$

use a

$$\begin{aligned} (4, -1) \\ y \\ -1 &= \frac{1}{2}(4) + b \\ -1 &= 2 + b \\ -2 &= b \end{aligned}$$

$y = \frac{1}{2}x - 3$

Write an equation in slope / intercept form of each line.

5) slope = $\frac{1}{2}$; x-intercept = 4
 $m = \frac{1}{2}$ (4, 0)
 not b ;

$y = \frac{1}{2}x + b$

use a

$$\begin{aligned} (4, 0) \\ y \\ 0 &= \frac{1}{2}(4) + b \\ 0 &= 2 + b \\ -2 &= b \end{aligned}$$

$y = \frac{1}{2}x - 2$
