

Algebra I

3-1

Solving One-Step Equations

Solve -

Solve.

1) $x - 7 = 13$

2) $z + 8 = 31$

3) $-19 + a = 23$

4) $4.5 = x + 1.6$

$$x - 7 = 13$$

Solve.

$$5) 4x = 44$$

$$6) -8c = 72$$

$$7) \frac{1}{2}x = 12$$

$$8) -\frac{1}{8}b = 8$$

$$9) \frac{3}{2}x = 15$$
