

# Algebra I

3-4

Solving Equations - Variables on Each Side

---

Solve -

1)  $5n = 2n + 6$

13)  $4n + 5 = 6n + 7$

19)  $2(x - 6) = 3$

\*)  $(8x + 3) - 7 = 4(2x + 1)$

\*)  $3(2x - 5) = 6(x - 2) - 3$
