

Calculus AB

4-2
Area

Find the area bounded by the x-axis and $f(x) = x^2$ between 0 and 2.

Develop a formula using Sigma Notation to add up the area of each rectangle from x_0 to x_n using Right Hand estimation.

How many rectangles are used to estimate the area?

How do I calculate the area of any generic rectangle?

$$F(x_i) \Delta x$$

What is the formula using Sigma to add all the areas?

$$\sum_{i=1}^n F(x_i) \Delta x$$

How do I calculate Δx ?
if all $\Delta x = x_i - x_{i-1}$
if equal $\Delta x = \frac{x_n - x_0}{n}$

Find the area bounded by the x-axis and $f(x) = x^2$ between 0 and 2 using Right Hand estimation with 4 rectangles.

$$\sum_{i=1}^4 F(x_i) \Delta x$$

$$\sum_{i=1}^4 (x_i)^2 \left(\frac{2-0}{4}\right)$$

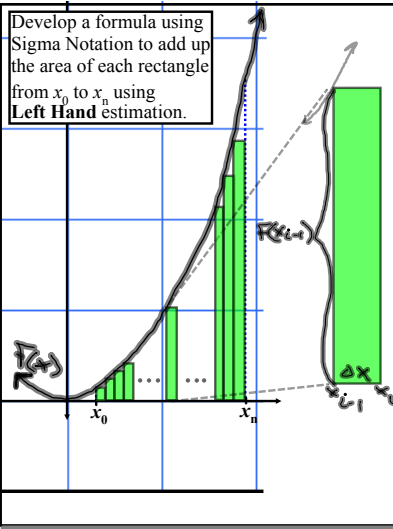

- $x_1 = \frac{1}{2}$
- $x_2 = 1$
- $x_3 = \frac{3}{2}$
- $x_4 = 2$

$$\sum_{i=1}^4 (x_i)^2 \Delta x = \left(\frac{1}{2}\right)^2 \left(\frac{1}{2}\right) + (1)^2 \left(\frac{1}{2}\right) + \left(\frac{3}{2}\right)^2 \left(\frac{1}{2}\right) + 2^2 \left(\frac{1}{2}\right)$$

$$\frac{1}{8} + \frac{1}{2} + \frac{9}{8} + 2 = \frac{15}{4}$$

Develop a formula using Sigma Notation to add up the area of each rectangle from x_0 to x_n using Left Hand estimation.

What is the formula using Sigma to add all the areas?

$$\sum_{i=1}^n F(x_{i-1}) \Delta x$$

Find the area bounded by the x-axis and $f(x) = x^2$ between 0 and 2 using Left Hand estimation with 4 rectangles.

$$\sum_{i=1}^n F(x_{i-1}) \Delta x$$

- $x_0 = 0$
- $x_1 = \frac{1}{2}$
- $x_2 = 1$
- $x_3 = \frac{3}{2}$
- $x_4 = 2$

$$\sum_{i=1}^4 (x_{i-1})^2 \Delta x = (0)^2 \frac{1}{2} + \left(\frac{1}{2}\right)^2 \frac{1}{2} + (1)^2 \left(\frac{1}{2}\right) + \left(\frac{3}{2}\right)^2 \frac{1}{2} = 0 + \frac{1}{8} + \frac{1}{2} + \frac{9}{8} = 2$$

Compare Right Hand estimation to Left Hand estimation.

$$\frac{7}{4} \quad \frac{15}{4}$$

$$\approx \neq$$

Find the average

$$\frac{\frac{7}{4} + \frac{15}{4}}{2} = \frac{22}{8}$$

$$\frac{11}{4} = \frac{11}{4}$$

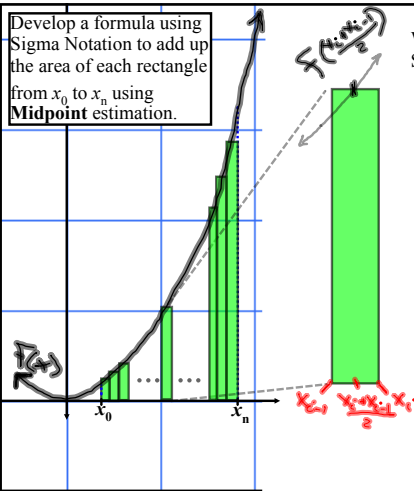

Assignment:

Pg. 268
29-33 odd,
41, 43

(Note to instructor: Continue for Midpoint Rule if time allows)

73, 75

Develop a formula using Sigma Notation to add up the area of each rectangle from x_0 to x_n using Midpoint estimation.

What is the formula using Sigma to add all the areas?

$$\sum_{i=1}^n F\left(\frac{x_i + x_{i-1}}{2}\right) \Delta x$$

Find the area bounded by the x-axis and $f(x) = x^2$ between 0 and 2 using Midpoint estimation with 4 rectangles.

$$\Delta x = \frac{1}{2}$$

$$x_0 = 0$$

$$x_1 = \frac{1}{2}$$

$$\rightarrow \frac{3}{8}$$

$$x_2 = 1$$

$$\rightarrow \frac{5}{8}$$

$$x_3 = \frac{3}{2}$$

$$\rightarrow \frac{27}{8}$$

$$x_4 = 2$$

$$\left[(1)^2 - \left(\frac{1}{2}\right)^2 + \left(\frac{3}{2}\right)^2 - \left(\frac{1}{2}\right)^2 \right] \frac{1}{2}$$

$$\boxed{2 \frac{21}{8}} = \frac{21}{4}$$
